**Fusionpage Tools and Background**

**Fusion Tools**

- 1.) When creating a classroom fusion page, all tools and functions can be found in the “Add Fusion Tool” drop down menu. This drop menu gives a wide variety of choices but they can only be used once.
  - a. “Tasks” tool you can create a to-do list or any list you may need for your class. If you could like to change the heading from “Tasks” to something different, you can do this by clicking on the pencil next to the word “Task”. By changing the name from “Tasks” to “Newsletters”, you can use it as a monthly update system for parents.

- b. “Web Pages” will allow you to create a list of websites for your students to view at home. After you enter your web pages your students can simply click on the link to ensure an accurate link. The “Links” tool is similar to this and will allow you to input websites for your students and parents.
  - c. “Announcements” tool will allow you to keep both students and parents up to date on important events or great projects that are happening within your class.
- 2.) You can change the placement of the “Fusion Tools” by clicking and dragging on the first arrow icon.

Each “Fusionpage” can be changed to fit the classes exact needs.

Don’t feel you have to use the same layout for every class. Each page can have its own layout and tools.

### Fusionpage Tools and Background

#### Background and Sound

- 3.) When changing your background, you can also add sound to your Fusionpage.
- Click the Fusionpage you wish to make changes to and click on “Edit Configuration”. Each page can have both a different background as well as a different song. You can upload your own pictures but it may be hard to see the words depending on the picture.

- Scroll down to the bottom of the page and click “Edit Background and Sounds”
